Cryptocurrency networks aiming to disrupt payments do not typically have many features aside from those necessary to define, transfer, record and secure transactions on the network. Some might consider Bitcoin, the original cryptocurrency, as a good example of a payment cryptocurrency, as it was designed as an alternative to traditional cash.

Airdrops are a part of a broader marketing strategy that involves social media promotion, blog posts, and different levels of crypto holder participation. Just like supermarkets distribute free samples of an item to promote sales, blockchain-based startups give away free coins to incentivise the use of their platform.

Constellation offers a first-of-its-kind opportunity to earn crypto. Purchase the Dôr Traffic Miner, a battery-operated, people-counting hardware device you can place in any doorway, anywhere. Then sit back and relax. While it collects foot traffic data, you earn crypto rewards. Its that simple.
Probably, the biggest difference that distinguishes a state-controlled cryptocurrency from others is that the former has legal status. For instance, the digital yuan can be used as a payment mechanism and positioned as a legal tender. On the other hand, other cryptocurrencies do not have a centralised structure.

Log in to your GitHub account and click on Settings under your profile. Go to Developer Settings ->Personal Access Tokens. Generate a new token. Add a name and select the scope for the API access and click on Create Token. In the next screen, make sure to copy the token and save it in a file.
