Many investors have started to use cryptocurrencies as a digital asset rather than a payment method. Investors can participate in the returns of a cryptocurrency via Exchange Traded Notes (ETNs). Most ETNs hold large parts of the invested assets in physical coins as collateral.

The argument centres on whether cryptocurrencies should be classified as securities and the answer could have major ramifications for the way the world of digital assets operates going forward. This is because anything classed as a security is regulated in the US by the Securities and Exchange Commission (SEC) and in the UK by the Financial Conduct Authority (FCA).
