Blockchain Social Media are decentralized networking platforms built using blockchain protocols/platforms that allow the development of applications and smart contracts. To name a few, Ethereum, Steem, Stellar are some of the blockchain protocols that support the development of social media DApps.

The opportunity to become the dominant social network, social media blockchain rather, is so huge that there are many others vying for that crown. The safest strategy of all would be to get a small allocation to a few different social media blockchains so that you've a higher chance of having a position in whichever one

or group of networks wins out.

The Beginners Guide to Venus Protocol - Frontier Protocols

Blockchains ledger technology has the ability to completely upend the media and social media industries. Blockchain is currently being used to disseminate royalty payments for music, movies and streaming services, and as a means to stop the spread of fake news across social media by identifying a single source of truth.

1. Ensure you are signed out of all other Coinbase accounts. 2. On Coinbase Exchange, select Portfolio. 3. On the right-hand side, select Deposit > USD > Wire Transfer. 4. Follow the instructions shown. Note: It is important to include the Reference Code to ensure the funds are routed directly to your Exchange account. Additionally, the name on your bank account must match the name on your Coinbase account.
