Coinsquare is engaging with Canadian regulators to establish industry standards for online platforms that offer trading in cryptoassets and related financial services.

A decentralized exchange is a cryptocurrency exchange where you can trade cryptocurrencies from your own wallet without trusting third parties. Decentralized exchanges are powered by smart contracts which allow users to trade cryptocurrencies directly with other users or through liquidity pools. Decentralized exchanges are non-custodial exchanges and based on smart contracts, so there is no need to trust a third party with your funds.
