Using AkropolisOS, developers are able to create platforms that allow users to invest, lend, save, and earn from their staked cryptocurrencies. It has even delivered a way to create under-collateralized loans, which is a unique spin on DeFi. It works through the creation and control of capital pools that remain under DAO governance.

In order to connect your bot to Coinbase Pro, you need an API key. Think of an API key as a bridge between Cryptohopper and the exchange, which allows your bot to do things like place automated orders and read your balance for its calculations. Step one. Go to the exchange website, and create an account if you haven't already. Step two. After you have logged in successfully, click on your name in the top right corner, and click

"API".
