its pretty simple. im not an expert with this stuff and am still learning myself but i can offer what i know. -- so assuming you have a coin base account- you will have an eth wallet connected to your coinbase account. in coinbase hit receive in your eth wallet and your coinbase wallet adress will pop up. copy that. then go into your metamask wallet an click send. put in your coinbase eth wallet and send it.

MetaMask is Ethereum based. (No Bitcoin) There is no connection other than a transfer transaction which is mainly a blockchain database update. All wallets have a send/receive button. Please sign in and read from top to bottom each wallet. You have to train yourself how to use each in your own time. 2.5K views Manasseh Mathias
