Non-custodial Exchange vs Custodial Exchange. We must admit that there are more crypto users using custodial exchanges than non-custodial exchanges. Hence, the likes of Binance, Paxful, LocalBitcoins, Remitano which are custodial exchanges are more popular in the cryptocurrency world.

Opposed to a custodial exchange that requires control of your funds, a non-custodial exchange allows you to trade without handing over your funds to a third-party and the ability to maintain control over your private keys. If you are the only person with access to your private keys, only you can choose what happens with your funds, and this is one of the reasons non-custodial exchanges can be extremely secure to use.

eToro is a bit different compared to most other exchanges. You cant deposit any crypto into eToro, you can only buy from them. Similarly, we cant withdraw from eToro to Binance directly, as we have seen today, first you need to withdraw from the eToro trading app to the eToro wallet, then to Binance, so there is an extra layer involved.
