Moving averages are among the most popular Polymath price prediction tools. As the name suggests, a moving average provides the average closing price for POLY over a selected time period. For example, a 12-day simple moving average for POLY is a sum of POLYs closing prices over the last 12 days which is then divided by 12.

A private key is like a password a string of letters and numbers that allows you to access and manage your crypto funds. When you first buy cryptocurrency, you are issued two keys: a public key, which works like an email address (meaning you can safely share it with others, allowing you to send or receive funds), and a private key, which is typically a string of letters and numbers (and which is not to be shared with anyone).

The good thing about crypto trading is that you are not required to maintain a required minimum amount of deposit in your wallet. The transaction fee, more often than not, is deducted as a percentage of the amount of your initial capital. This is why you do not have to be bothered by the investment money required in crypto trading.
