Copy trading is essentially a type of automated trading where you can automatically copy other traders. This means that as these other traders earn or lose money with their trades, you will do the same. Copy trading is ideal for many types of trader whether you want to copy trade forex, or other markets.

For most Forex brokers, the spread on EUR/USD is 1 pip. But on a copy trading platform, you might pay 2 to 3 pips more. But dont take my words for it because you can compare the spreads of a normal Forex broker with a copy trading platform and youll see the difference. So, whats the implication? Two things.
