While there are other ways to purchase crypto, many people acquire crypto on cryptocurrency exchanges. Upon making a purchase, the cryptocurrency you acquired is automatically stored in your exchange-hosted wallet, which is typically custodial, meaning the exchange has control of your private keys. By holding your keys for you, crypto exchanges give you easier access to your funds via a more familiar username and password configuration, which allows you to trade seamlessly on the exchange.

Wallets can be somewhat complicated. If you trade cryptocurrency on a crypto exchange, you'll have a wallet directly on the exchange for the cryptocurrency you use to trade. A crypto exchange wallet, however, is very different from a separate, dedicated cryptocurrency wallet software.
