Adjusting miner fees Wallet Help

Coinbase is a secure online platform for buying, selling, transferring, and storing digital currency.

Bitcoin derivatives exchange Bybit will require stricter know your customer (KYC) procedures for individuals and corporations who wish to withdraw more than 2 BTC on a given day, including facial recognition screening. We have had KYC procedures on certain selected group of customers since last year, a Bybit spokesperson reportedly said.

The platform charges high fees for both crypto-to-crypto transactions, as well as fiat conversions. The main reason for high bitcoin miner fees is supply and demand. The bitcoin block size is 1MB, which means that miners can only confirm 1MB worth of transactions for each block (one every ten minutes).

Coinbase Global Inc. is acquiring futures exchange FairX in its biggest step yet toward expanding into crypto derivatives. Already registered with U.S. regulators, the firm could give Coinbase the edge it needs in getting a derivatives marketplace up and running. Terms of the deal were not provided.

Such glitches should not be present in any system. Of course, Coinbase have so many customers they only need to scam a small proportion to make easy money. So signing up to Coinbase is a gamble, chances are you will be ok but for, say 1% of customers, your account will be chosen to be emptied and you can kiss you fiat and crypto goodbye!
