Gemini Active Trader is a trading platform where you can create buy and sell orders when you want to trade crypto. You are able to execute continuous, auction and block trades on this platform. The trading platform can look really overwhelming if its the first time youre using it.

Go to CoinMarketCap and search for Ravencoin. Tap on the button labeled Market near the price chart. In this view, you will see a complete list of places you can purchase Ravencoin as well as the currencies you can use to obtain it. Under Pairs you&#39;ll see the shorthand for Ravencoin, RVN, plus a second currency.

Before we go any further, lets understand what we mean by centralized and decentralized exchanges. Centralized and Decentralized Exchanges Centralized Exchange - Every exchange of this type has their own order book which receives and reviews all trade orders and matches them accordingly using their own software and servers. In short, the order is processed by an internal closed system. Decentralized Exchange - Naturally

According to an analysis, centralized crypto exchanges take an average of 10 milliseconds to execute orders whereas a decentralized exchange takes minimum 15 seconds to match and fill an order. Besides, a decentralized exchange can take up to one minute to complete an order, which is a considerable amount of time in comparison to its centralized counterpart.
