Before we go any further, lets understand what we mean by centralized and decentralized exchanges. Centralized and Decentralized Exchanges Centralized Exchange - Every exchange of this type has their own order book which receives and reviews all trade orders and matches them accordingly using their own software and servers. In short, the order is processed by an internal closed system. Decentralized Exchange - Naturally

An Amazon spokesperson made an announcement declaring that Amazon has no immediate plans to accept cryptocurrency as a payment method. The e-commerce giants announcement came after a tabloid in England falsely declared that Amazon would accept cryptocurrency by the end of the year and launch their own cryptocurrency by 2022.

KYC, which is short for "know your customer" as well as "know your client," is the process of verifying a customer's identity. It's most common with financial institutions and financial service.

KYC-collecting exchanges are honeypots for hackers to steal personal identification from its customers. According to the blockchain analysis firm Chainalysis, exchanges faced more successful attacks in 2019 than in any other year since 2011. Your identification documents are often very valuable to people who commit identity fraud.

Know Your Customer (KYC), or sometimes referred to as Know Your Client, is a process by which a business or agency verifies the identity of its clients. The process is mandatory for banks, lenders, insurance providers, and other financial and monetary companies of all sizes. KYC is a data-driven process that allows companies to ensure that their customers are who they claim to be, to ascertain the suitability of a customer for their services, and to avoid any malicious or criminal activity.
