Sushi coin is linked to SushiSwap, which is a decentralised exchange, or DEX for short. This is like a regular currency exchange, except that it allows people to exchange crypto via a smart contract (a computer program that automatically executes sales and other agreements when the right conditions are met), using the Ethereum blockchain.

With eToro, the leading social trading platform, you can connect, share strategies, and discuss CFD trading with millions of users. CFDs also provide the flexibility that makes it possible to copy other traders actions with proportional accuracy, automatically in real time. Copying experienced traders is a great way for beginners to get started trading CFDs.
