TradingView is not a broker but rather a charting platform showing you the world wide access to market data under the form of charts. I must say it is one of the best and most seamless charting platform I have ever seen. You can also make an account there and customize the chart to apply your method of analysis.

Controlling shares of the token have been burned meaning that no one can retrieve the initial liquidity provided to PancakeSwap to enable trading, and no one can make any alterations to the smart contract. That makes Saturna unrippable as there is no mint function to change the supply or alter the current tokenomics.

This API lets brokers build a bridge to connect their backend systems to the TradingView interface, so that broker partners then can be supported on the TradingView Web Platform. The integration is very straightforward. The broker builds a REST Web API on its own servers based on our specification so that it can be connected to TradingView. TradingView provides a sandbox and required technical assistance to get your TradingView Web Platform integration started.
