What are the fees on Coinbase Pro? Trading Fees. Coinbase Pro uses a maker-taker fee model for determining its trading fees. Orders that provide liquidity (maker orders) are charged different fees than orders that take liquidity (taker orders). Fees are calculated based on the current pricing tier you are in when the order is placed, and not on the tier you would be in after a trade is completed. Your fee tier is recalculated hourly based on your total trading volume.

A key benefit of futures contracts, particularly the USD-margined contracts, is that you can easily calculate their returns in fiat. For example, when you make 500 USDT in profit, you can easily estimate that the profit is worth approximately \$500 - since the value of 1 USDT is pegged closely to 1 USD.
