TRC20-USDT refers to USDT issued on the TRON network, ERC20-USDT refers to USDT issued by Tether on the Ethereum network. The USDT issued on TRC20 and ERC20 are both identical, however fees to transfer this USDT can often be cheaper on the Tron network using TRC20. Deposit addresses for these are always Ethereum addresses and these deposits / withdrawal transactions occur on the Ethereum network.

Both ERC20 and TRC20 are smart-contract tokenization standards that offer the ability for the user to create a token for themselves, and these tokenization standards differ mainly on which cryptocurrency network they're on, where ERC20 is on the Ethereum blockchain, and TRC20 is on the Tron blockchain. There are other differences well discuss, but that is the biggest difference.
