Coinbase, the company behind the cryptocurrency trading platform of the same name, is going public via
direct listing. It filed S-1 paperwork on Thursday with the Securities and Exchange Commission, and that
paperwork contained a variety of details about the company that were previously unknown.

The most common trading platforms are the MetaTrader 4 and 5 (MT4 and MT5, respectively). Introduced in
2005, both are programs developed by MetaQuotes Software for trading currencies via the internet. In
addition, MT4 Forex brokers and MT5 Forex brokers offer more platforms to clients as well.

There are popular universal Forex trading platforms such as the famous MetaTrader, for instance, and
specially tailored platforms for particular websites. For example, eToro broker uses its own platform.
According to the type of integration. There are web-based browser-styled platforms, but many brokers
integrate software for installation, too.
