Cryptocurrency exchanges technically can be of two types: custodial and non-custodial. Custodial exchanges hold their users funds, non-custodial crypto exchanges do not. But how that happens is a complex story with multiple intricacies hidden inside.

A day trading strategy must include entry and exit signals; in other words, when to get into a position and when to get out of it (request a demo on the right to get free access to an award winning signals software that will visually show you where to buy and sell).

Non-custodial Exchange vs Custodian Exchange: Benefits And .

Ftx offers Lending where we can lend out crypto to maintain an interest rate. As with the below diagram at this time we can see funding rates are exceedingly high. Its very easy to buy on average and stake through this method to increase exposure and allow us to build a larger position over a short period of time.

Opposed to a custodial exchange that requires control of your funds, a non-custodial exchange allows you to trade without handing over your funds to a third-party and the ability to maintain control over your private keys. If you are the only person with access to your private keys, only you can choose what happens with your funds, and this is one of the reasons non-custodial exchanges can be extremely secure to use.
