So I lately invested in cryptos as a long term investment, but soon realized that there is massive potential for day trading as well. If someone starts trading with \$1,000 and makes 1% profit per trade (which is not even that much in crypto - it happens multiple times a day on most coins, even in the current crash), all someone really needs is 700 trades due to the power of compound interest.

While myself and others are trading without fear of making a loss others are being patient for the price to skyrocket. It all depends on the trading expert or the pattern you follow. I was able to make 4.3 BTC from 0.9 BTC in 3 weeks from implementing trade with tips and info from Martin Calvert Frazier.
