There are other differences well discuss, but that is the biggest difference.

So I lately invested in cryptos as a long term investment, but soon realized that there is massive potential for day trading as well. If someone starts trading with \$1,000 and makes 1% profit per trade (which is not even that much in crypto - it happens multiple times a day on most coins, even in the current crash), all someone really needs is 700 trades due to the power of compound interest.

Bittrex trading fees are relatively low. The usual charge for each trade is 0.25%. While this percentage might be a little higher than some other exchanges, such a fee makes transactions for new traders much simpler when compared to other exchanges. Another key feature that makes Bittrex one of the best exchanges in the market is its speed.

Every day, Bittrex reviews which currencies it lists. It adds exciting new coins as often as they can. By comparison, Poloniex only has around 80 cryptocurrencies to trade. Verification: This is the process by which

an exchange checks who you are before you're allowed to start trading.
