The Orion Protocol was designed to aggregate the liquidity of multiple crypto exchanges into a decentralized platform that provides a singular, non-custodial gateway into the entire digital asset market.

Orion Protocol is, just like all other cryptocurrencies, a risky investment. It does have higher probability of going up than down because of the good use case, well-designed tokenomics, active community and a solid team behind it. How much will Orion Protocol be worth? For the short-term future, it could reach \$6.01.
