Venus is a simple lending and borrowing platform where De-Fi users can lend their crypto assets to earn interest on them. Users can also borrow assets from the market by paying interest. This in turn creates a fair and secure environment for lending and borrowing of assets. But, is it only about lending and borrowing of

assets and nothing more?

Portability: MLB Crypto Baseball asset is a fully compliant ERC-721 item. Ownership and details about the asset will be recorded to the blockchain and will be available as long as Ethereum exists. Provable Scarcity: Each ERC-721 NFT asset will be tracked on the blockchain along with its unique details and team information.

Having talked about one of the ways of building a cryptocurrency exchange, lets now focus on what are the main steps involved while building a good cryptocurrency exchange like that of Binance. First things first give utmost importance to the design creation. This basically involves two steps wireframes, where the key features are implemented, and a prototype which is nothing but a detailed visualization of the users interaction with the application that allows preventing .
