Firstly, there are one major difference between day trading cryptocurrency and day trading real-world assets. The reason for this is volatility. Volatility is when the price of an asset moves up or down really quickly, meaning it can either be a great success for the trader or alternatively a great failure.

The term day trader comes from the stock market, where trades generally only happen during regular business hours on weekdays. One notable difference when day-trading cryptocurrency is that crypto markets stay open 24 hours a day, 7 days a week.
