MT4 was built to trade Forex while MT5 was designed to allow easier trading in non-Forex CFDs. They use different programming languages and MT5 allows faster back testing than MT4. MT5 also allows a DOM (depth of market functionality) and is technically supported by MetaQuotes, unlike MT4.

The main difference between MT4 vs MT5 for this point of comparison is that MT4 has fewer technical indicators built in to the platform. However, it has a larger library of third party plug-ins than MT5 does. This is probably because MT4 has been around for longer and still has a larger community of traders using it.
