Automated market makers (AMM) are decentralized blockchain protocols that power the vast majority of decentralized exchanges (DEX). Automated market makers enable peer to peer cryptocurrency trading without the need for an order book.

Everyone seems to want cryptocurrency these days. But to get in on the action, you'll need a crypto exchange where you can buy and sell digital currencies, like Bitcoin, Ethereum and Dogecoin .

Automated market makers (AMMs) are a mechanism used by most decentralized exchanges to facilitate permissionless trading. AMMs make use of liquidity pools containing 2 or more assets, and prices are derived based on the proportion of each asset in that pool as well as the mathematical function used. Orders through an AMM are executed automatically via a smart contract that will calculate the trade prices algorithmically, including any slippage from the trade execution.
