How Does Binance Coin Work and What Technology Is Behind It? BNB is built on Ethereum blockchain and uses ERC20 tokens which can store and hold value. However, you can't mine tokens as they have been pre-mined and distributed through ICO. Tokens in circulation are used for discounted trading on Binance Exchange.

Binance offers a staking service called Locked Staking. Locked staking requires you to lock the coins you wish to stake for a certain period to earn rewards. During the staking period, your cryptocurrencies will be locked and you would not have any access to these coins until the staking period is over.
