A private key is like a password a string of letters and numbers that allows you to access and manage your crypto funds. When you first buy cryptocurrency, you are issued two keys: a public key, which works like an email address (meaning you can safely share it with others, allowing you to send or receive funds), and a private key, which is typically a string of letters and numbers (and which is not to be shared with anyone).

Internet Computer (ICP) is a utility token that allows users to participate in and govern the Internet Computer blockchain network. The network aims to help developers create websites, enterprise IT systems, internet services, and DeFi applications by "installing their code directly on the public Internet." ICP can also be staked or "converted into cycles" that can be used to power computation for dApps and traditional applications.

To manage your security key(s): In your Coinbase account, go to Settings & Security. Under the selected 2-step verification method, you'll be able to manage your security key which includes adding another security key. Please note, there is a maximum of 5 keys. By adding more than one security key, you enable a backup option in case you lose your primary security key
