Storj. Is a decentralized cloud storage provider that allows for total protection of your private data. The network is distributed and all files are end to end encrypted. Unlike a centralized provider like the one you would get when using Google, your files are yours alone. Their pricing is also more attractive and very transparent.

Storjs is noble and good, but unfortunately, it is facing very stiff competition, and it is probably a major reason why its price is expected to struggle in the next few years. Apart from traditional competition from the likes of Google and Amazon, Storj also faces competition from the crypto market, namely Siacoin and especially Filecoin.
