IMO, kraken is the best exchange. It's the mix of many factors: They don't have as many altcoins as Binance but still many, they offer staking for some coins (although not many and not the best rates), they are a registered company in a country with a solid legal system and with real offices and known people (unfortunately that means you need to do their terrible KYC process), you can buy .

Sandbox A public sandbox is available for testing API connectivity and web trading. While the sandbox only hosts a subset of the production order books, all of the exchange functionality is available. Additionally, in this environment you are allowed to add unlimited fake funds for testing. Login sessions and API keys are separate from production.

In this period of crypto regulations and KYC verifications, choosing the right exchange for your needs is more and more important: So I decided to write a little guide about the pros and cons of the most and less known exchanges (also because I didn't see a proper list in this subreddit). If you want to let other people read this guide, consider upvoting (I worked a lot to create this post).

LONG-SHORT RATIO. Great for BTC and crypto environment. Absolute values of long and short positions can be misleading as since time passes new market participants join the crypto space. Also, Long tend to be long time holders, while shorters tend to be short time shorter. It is the ratio of the two levels (no matter what they are) that is a better indicator than the two of them taken separately.
