How Crypto Arbitrage Works. To make different exchanges via this method, you must first pay attention to crypto values on various platforms. When you see that a value is higher on one platform than the other, its time to make your move. In quick succession, you'll buy the lower price crypto, then sell it at the higher price on the other .

IMO, kraken is the best exchange. It's the mix of many factors: They don't have as many altcoins as Binance but still many, they offer staking for some coins (although not many and not the best rates), they are a registered company in a country with a solid legal system and with real offices and known people (unfortunately that means you need to do their terrible KYC process), you can buy .

Cryptocurrency arbitrage uses the same principle of arbitrage from traditional markets. Usually, this practice can be made using two different crypto exchanges that have different prices . To make the crypto arbitrage profitable, you need to buy crypto assets at a lower price and then sell them at a higher price on other exchanges.
