A cryptocurrency, crypto-currency, or crypto is a collection of binary data which is designed to work as a medium of exchange. Individual coin ownership records are stored in a digital ledger, which is a computerized database using strong cryptography to secure transaction records, to control the creation of additional coins, and to verify the transfer of coin ownership.

Cryptocurrency is formed from two words - crypto (data encryption) and currency (medium of exchange). Thus, a cryptocurrency is a medium of exchange (like ordinary money) that exists in the digital world and uses encryption that ensures the security of transactions. Cryptocurrency is an alternative form of payment in cash and credit cards.
