Anonymous Bitcoin and Altcoin Exchanges. Every option we can find for anonymous exchanges and the countries where people are using them for buying and selling bitcoin and altcoins worldwide. With many countries regulators requiring a KYC (know your customer) or AML (anti-money laundering) verification process to have regulated exchanges, the privacy many people value with Bitcoin, Monero and other Altcoins is always going to be difficult to protect.

To start trading crypto, follow these steps: Do your research. Just like in the stock market, you need to do a thorough research of the market and the assets before. Find the best crypto exchange for you; Buy crypto of choice; Trade the crypto for profit (plan your trade, trade your plan); .

The platform lets you stay anonymous unless your country has certain laws that require crypto exchanges to perform KYC checks on all their customers in order to be compliant. Some payment methods also require some form of ID verification.

Coinbase says not to do it because small transactions can overload their network but I dont think its much of a problem if your not getting 30 payouts a day.
