KYC-collecting exchanges are honeypots for hackers to steal personal identification from its customers. According to the blockchain analysis firm Chainalysis, exchanges faced more successful attacks in 2019 than in any other year since 2011. Your identification documents are often very valuable to people who commit identity fraud.

The Osmosis platform operates using the Keplr wallet, which supports Cosmos Inter Blockchain Communication (IBC). Keplr is used for staking at Osmosis. To create a wallet, go to the Keplr website.

An API Key can be considered as a username. This is generated by the exchange once you declare your settings. An API Secret or API Private Key is simply another string of characters that must be used in combination with the API Key to establish the connection. An additional security layer can be added by generating an API Passphrase. While the API Key and Secret are generated by the exchange, the Passphrase is commonly generated by the user.
