You may have heard of people losing their keys or losing their USB wallet but with a hosted wallet you dont have to worry about any of that.

Crypto OTC trading is a way of exchanging cryptocurrencies, between buyers and sellers, usually with large orders that are handled most often by a third party. It can happen between one person and another only (P2P),

but usually, this is done via specified platforms to oversee that everything is getting executed correctly. Before you begin trading, you'll need to attach a payment method to your Coinbase account. In the U.S., you can use a bank account, debit card, wire transfer or PayPal account (you can't currently sell digital currency using a PayPal account, but you can make withdrawals). Once you have your digital wallet set up, you're ready to trade.
