IMO, kraken is the best exchange. It's the mix of many factors: They don't have as many altcoins as Binance but still many, they offer staking for some coins (although not many and not the best rates), they are a registered company in a country with a solid legal system and with real offices and known people (unfortunately that means you need to do their terrible KYC process), you can buy .

In this period of crypto regulations and KYC verifications, choosing the right exchange for your needs is more and more important: So I decided to write a little guide about the pros and cons of the most and less known exchanges (also because I didnt see a proper list in this subreddit),If you want to let other people read this guide, consider upvoting (I worked a lot to create this post).

The crypto bot can accomplish this by either: 1. Sending trade signals to the user 2. Executing buy or sell orders automatically. In the first instance, users would be notified the moment certain market conditions are met, at which time they could execute a trade manually. This might be a simpler version of a bitcoin trading bot.
