Make sure all usernames, PINs and passwords related to your crypto wallet strong. Consider a multisignature wallet. Multisig wallets require more than one private key to authorize a transaction, which means another user or users will need to sign each transaction before it can be sent.

Simply put, crypto wallets are applications or tools that allow crypto holders to track, spend, and store their coins. There are two types of cryptocurrency wallets. These two classes are software and hardware wallet, and both have unique modes of operation that suits participants with varying needs.
