The countrys central bank will provide its currency to another country's central bank in whats called a liquidity swap. The lending central bank uses its liquid state currency to buy the liquid state currency of another borrowing central bank at the market exchange rate. The lender then agrees to sell the borrower's currency back at a rate that also includes any interest accrued up to that point on the loan.

KYC is an extremely vague term, and there is no list which exhaustively details all possible ways to carry this out. This is no different when investigating whether or not is possible to buy crypto without KYC. As a result, most reputable organisations implement industry best-practices and processes developed internally.
