So I lately invested in cryptos as a long term investment, but soon realized that there is massive potential for day trading as well. If someone starts trading with \$1,000 and makes 1% profit per trade (which is not even that much in crypto - it happens multiple times a day on most coins, even in the current crash), all someone really needs is 700 trades due to the power of compound interest.

Your long-term crypto investment involves maintaining it for a period based on your investing goals. Typically, long-term investors hold their investments for several years or decades to grow their returns. So, if you believe blockchain-based technology will explode in the future, investing in crypto for the long term can be a great option.

Mirror Protocol is a decentralized finance (DeFi) platform built on the Terra blockchain. As outlined in Mirror documentation, the ultimate goal of the project is to give users exposure to traditional financial markets while avoiding common issues such as high brokerage fees and global accessibility. The project facilitates this by creating fungible tokens, known as mAssets, that track the price of real-world assets.

Bittrex trading fees are relatively low. The usual charge for each trade is 0.25%. While this percentage might be a little higher than some other exchanges, such a fee makes transactions for new traders much simpler when compared to other exchanges. Another key feature that makes Bittrex one of the best exchanges in the market

is its speed.
