Direct access brokers who aren't solid don't remain in business for very long. The customers who would open a direct access trading account are savvy traders/investors who aren't going to put up with a sub-par product, so lackluster companies usually don't remain in business in this industry for very long.

When you have direct access, you have information about order sizes, firms involved in the trade and prices they're getting. Information like this can be used by day traders to make rapid decisions.
