Copy trading is a sub-category of social trading however the services offered by social trading and copy trading networks differ in several key aspects. Social trading is a general classification of a type of trading technique, whereas copy trading refers to those platforms that allow traders to automatically copy the trading signals of other investors and create a portfolio of traders.

Moving averages are among the most popular ECOMI price prediction tools. As the name suggests, a moving average provides the average closing price for OMI over a selected time period. For example, a 12-day simple moving average for OMI is a sum of OMIs closing prices over the last 12 days which is then divided by 12.
