The crypto bot can accomplish this by either: 1. Sending trade signals to the user 2. Executing buy or sell orders automatically. In the first instance, users would be notified the moment certain market conditions are met, at which time they could execute a trade manually. This might be a simpler version of a bitcoin trading bot.

BitBase aims to tokenize its service. The process of tokenizing an asset and further managing it on an app opens up new opportunities as it faces subsequent challenges to its adoption. The new tokenization method allows the issuer to open up innovative methods and promote widespread adoption of investments in this industry.
