Coinbase is the largest cryptocurrency exchange in the USA, and it offers more than 70+ cryptocurrencies to its 68 million users. The features that make Coinbase such a popular exchange are its user-friendly platform, simple registration, various deposit methods, and crime insurance cover against cybersecurity breaches. ETF trading is done on stock exchanges, making ETFs easy to buy and sell without help from a broker or investment advisor. And since they are funds made up of collections of assets, they offer investors easy entry into various markets, sectors, indices, and more since investors don't need to buy each underlying asset individually.
