In this video, I send Ethereum from Coinbase Exchange to Coinbase Wallet. Im doing this so that I can buy NFTs for Gala Games at OpenSea. Once I have Ethereum in Coinbase Wallet, I can then link that to Opensea and easily purchase NFTs. Those NFTs can remain in Opensea as part of my collection or I can send them over to Gala Games.

I went through FTX Exchange to do a SEPA withdrawal, worked fine, though they don't have instant transfer like binance so expect it to take 2-3 days to clear into your account. Have to complete KYC, of course. To move your funds they support BUSD in bep2 version so thats a cheap way to withdraw from binance and deposit into FTX. Recommend!
