The countrys central bank will provide its currency to another country's central bank in whats called a liquidity swap. The lending central bank uses its liquid state currency to buy the liquid state currency of another borrowing central bank at the market exchange rate. The lender then agrees to sell the borrower's currency back at a rate that also includes any interest accrued up to that point on the loan.

KYC-collecting exchanges are honeypots for hackers to steal personal identification from its customers. According to the blockchain analysis firm Chainalysis, exchanges faced more successful attacks in 2019 than in any other year since 2011. Your identification documents are often very valuable to people who commit identity fraud.

A crypto savings account may be advertised as having a 12% APY, but that high of a return requires you to receive 2% in the platform's native coin. Or you might need to hold a specific number of the native coin before you're eligible for the highest APY. Interest payments too depend on the crypto savings account or platform you use.
