The Grin blockchain has no addresses and doesnt store data about the amounts transferred. On the Grin network, a new block is generated every 60 seconds, and each has a grin mining reward of 60 grins. The network is set to generate 1 grin per second forever. This creates an increase in supply and a decrease in the inflation rate.

Wallet for GRIN For both mining and storage purposes we recommend you only the Grin++ wallet. It is constantly supported and it works like a charm. Official Grin wallet is terrible. It doesnt even feature a basic GUI interface that other wallets usually have. A command-line interface handles transactions and creating files.
