What is Gas in Crypto Gas fees are the cost that users pay to have their transactions validated on the blockchain. Supply and demand determines the current gas rate. When demand is high fees are high. When demand is low fees are low. Rates fluctuate in real-time, based on the number of transactions waiting to be validated on the network.

Gas is required for every operation the network, from small transactions to the execution of a smart contract, and thus, gas needs to be paid even if the transaction fails.
